

Gateway Group Acquires

FLOW NXT

A GATEWAY GROUP COMPANY

NextGen Feed Supply Chain Platform

Zoetermeer | January 30, 2025

The **Gateway Group**, headquartered in The Netherlands, is pleased to announce the acquisition of **FlowNxt**. FlowNxt is the only visibility platform that utilises a collaborative AI-driven data ecosystem to drive operational excellence across critical supply chain functions in the Feed Industry. FlowNxt enables seamless integration of applications and data without disrupting existing operations in the feed supply chain.

The collaboration between **Gateway Group** and **Nijhof-Wassink Group** led to the development of **FlowNxt**. It has been operational in the feed industry for the past three years and is backed by Gateway Group's end-to-end development and tech prowess. Gateway Group is entrusted to position FlowNxt on the global map of the feed supply chain. FlowNxt integrates disconnected and siloed applications in the feed industry and provides Visibility solutions for managing the supply chain. Feed producers, transporters, nutrition consultants and others in the ecosystem are FlowNxt customers.

Commenting on the acquisition, **Vipin Moharir, Partner, Gateway Group**, said, *"FlowNxt is the catalyst for global transformation of the supply-chain visibility in the feed industry. Through cutting-edge technology solutions that promote sustainability, FlowNxt provides unmatched visibility for supply-chain collaboration & thus, optimisation in the feed industry."*

A Software Engineering Company

Gateway Group, headquartered in The Netherlands and India, is a global technology solutions provider. Through its over 20 independent operating companies, across industry verticals (Automotive, Logistics, Cyber Security, and Others), Gateway delivers innovative IT platforms & services. Gateway Group companies drive digital transformation through cutting-edge technology, robust software solutions, and consulting excellence. Operating in 20 countries, the company is renowned for its focus on customer-centric innovation, agile delivery models, and seamless integration of emerging technologies like AI, IoT, and Trust chain. Group companies provide scalability, cost efficiency, and a competitive edge to become a trusted partner for future-ready solutions.

The Nijhof-Wassink Group is an internationally operating family business that has existed for over five decades and is a specialist in bulk transport by road, rail, and water. The Group leverages strategic modalities and has branches in The Netherlands, Belgium, Germany, Poland, and Hungary, offering its clients the most optimal logistic solution. Apart from transport, Nijhof-Wassink is also active in warehousing, storage, and tank cleaning. Nijhof-Wassink also coordinates the end-to-end logistics processes for producers and suppliers in the chemical and animal feed industry.
